

Cast & Wax:

CAST:

'98 mm (Wieland-comp.)

'95 mm (ZirkonZahn-comp.)

'71 mm (Ceramill-comp.)

Transparent only.

15 and 20 mm

WAX:

Blue, white.

'98 mm (Wieland-comp.)

'95 mm (ZirkonZahn-comp.);

'71 mm (Ceramill-comp.).

16, 20 mm

- ▶ CAD/CAM controlled fabrication in all systems
- ▶ easy to mill, no clogging on the cutter
- ▶ biocompatible
- ▶ burns out without any residual ash
- ▶ colours: blue
- ▶ thickness: 16 and 20 mm

- ✓ Burns out without residue.
- ✓ Optimal for casting/press ceramic.
- ✓ CAD/CAM controlled fabrication.
- ✓ Verifying frameworks on plaster model/in mouth.
- ✓ CAST: Intraoral try-in, easy to mill, no clogging of the cutter.
- ✓ Biocompatible: void of any harmful substances or irritants.
- ✓ Milling recommendation: low feed rate!

Time in mouth up to 12 mo. (Cast).

Full contour: ✓

Framework: ✓

Gingival cover: ✓

Millability: **excellent.**

Flex. strength: 115 MPa.

Water: insoluble.

Boiling Point: 177 °C – 350 °F.

Melting Point: 112 °C – 250 °F.

Components: 100% Organic.
